RE: Jeffrey Fenton, DOB: 10/08/1969

To Whom It May Concern:

Jeffrey Fenton has been a patient under my care since 2012. He is treated for a severe Generalized Anxiety Disorder, Attention Deficit Disorder, and suffers from an Obsessive Compulsive Personality Disorder. He also has specific phobias regarding weather, driving across bridges, and flying, along with obsessive concerns over his health.

His symptoms of severe anxiety, obsessive worry, preoccupation with details and rules, perfectionism, inflexibility, and problems with rigidity have all interfered with his ability to hold a job and have a healthy relationship.

I have prescribed medication including Lexapro 40 mg a day, Vyvanse 70 mg a day, Xanax 1 mg every six hours as needed, and Restoril 30 mg at night for chronic insomnia. He also has continued to see Terry Huff, LCSW, in psychotherapy. Despite his compliance with his medication and therapy, his symptoms continue to be disabling.

Please consider Mr. Fenton's severe psychiatric condition in any judgments being made about his ability to work and his ongoing divorce. If you have any questions regarding his treatment or prognosis, please contact me with his permission.

Sincerely,

Richard E. Rochester, M.D.
