S. Anne, M.D. R. Botta, M.D. I. Badr, M.D. R. Mahajan, M.D. H. Azzam, M.D.

Patient Name: Marsha Fenton
Visit Date: 7/2/2020

Thank you very much for letting me participate in the management of Marsha Fenton, who was seen by telephone consultation on 07/02/20. Marsha states that her IgA deficiency has been stable. She denies any upper or lower respiratory tract infection. She has been following strict avoidance measures from exposing to the COVID-19 infection. She is wearing the mask. She is staying home. Her son also stays with her, who is not working at this time. She denies any fever, chills, or rigors. She denies any upper or lower respiratory tract infection.

PHYSICAL EXAMINATION: Deferred at this time since this was done by telephone consultation.

IMPRESSION: Ms. Marsha Fenton has:

1. IgA deficiency, and
2. Chronic rhinosinusitis.

RECOMMENDATIONS:

1. Marsha is prone to develop recurrent infections. Therefore, I advised her to follow strict isolation measures from exposure to COVID-19 infection.
2. Since her son stays with Marsha, I strongly recommend that her son should do his work from home since it will reduce significantly the risk of exposure of Ms. Fenton to the COVID-19 virus.
3. A follow-up appointment has been scheduled in one year but I advised her to contact me as soon as the pandemic is over for further evaluation and treatment.

Re: IGA deficiency

In October, 2014, I was referred by my Internal Medicine Dr. Peddireddy to consult with Dr. Suresh Anne at the Asthma, Allergy, and Immunology Center in Flint MI. I was diagnosed with a primary immune deficiency. I have no detectable immunoglobulin A (IgA).

Dr. Anne told me I could no longer visit hospital patients or work in any part of the hospital. As a retired pediatric intensive care nurse, I had wanted to volunteer to work with children. I had to retire from my voluntary parish nurse position. I could no longer visit ill church members at home due to the danger of contracting an infection.

This was over 5 years before the dangerous covid-19. I have not gone to a store, church, hair salon, etc. since, due to the danger to my health. All food and supplies are delivered. None of my family is allowed to visit.....only my son who helps me maintain my health. If he gets exposed, I could easily have a disastrous outcome.

Thank you,

Marsha A. Fenton

To Whom It May Concern:

I had the pleasure of seeing Marsha Fenton on 12/10/2021. She is currently undergoing evaluation for immunodeficiency. I have recommended that she continue to take all precautions recommended for unvaccinated people given it is unclear whether she was able to produce a normal immune response to the COVID-19 vaccines and may not be protected. Therefore, if possible her son Jeff Fenton should continue to work remotely in order to avoid COVID-19 exposures for Marsha.

Any further questions can be directed to the office at the phone number listed above.

From the office of:
Mariel Rosati Benjamin, MD

Dear Dr. Peddireddy:

Thank you very much for letting me participate in the management of Marsha Fenton, who was seen by telephone consultation on 07/02/20. Marsha states that her IgA deficiency has been stable. She denies any upper or lower respiratory tract infection. She has been following strict avoidance measures from exposing to the COVID-19 infection. She is wearing the mask. She is staying home. Her son also stays with her, who is not working at this time. She denies any fever, chills, or rigors. She denies any upper or lower respiratory tract infection.

PHYSICAL EXAMINATION: Deferred at this time since this was done by telephone consultation.

IMPRESSION: Ms. Marsha Fenton has:

- 1. IgA deficiency, and
- 2. Chronic rhinosinusitis.

RECOMMENDATIONS:

- 1. Marsha is prone to develop recurrent infections. Therefore, I advised her to follow strict isolation measures from exposure to COVID-19 infection.
- 2. Since her son stays with Marsha, I strongly recommend that her son should do his work from home since it will reduce significantly the risk of exposure of Ms. Fenton to the COVID-19 virus.
- 3. A follow-up appointment has been scheduled in one year but I advised her to contact me as soon as the pandemic is over for further evaluation and treatment.

Once again, thank you very much for letting me participate in the management of Marsha Fenton. Please do not hesitate to contact me if you need any further information.

Respectfully,

Suresh Anne, M.D.
